Innovation. Delivered.

Download a concise, procurement-ready company profile for client review, business development, and institutional reference.

ABOUT SAE

Building technology that supports sustainable operations.

SAIF ASSOCIATES & ENGINEERING (SAE) is a Bangladesh-based technology and engineering company delivering enterprise software systems, workforce solutions, infrastructure services, ICT consultancy, and communication technologies.

SAE helps organizations modernize operations through practical engineering, structured implementation, and long-term operational support. The work is focused on systems that are reliable, maintainable, support-ready, and useful for real organizational workflows.

VISION

To become a dependable technology partner for organizations that need sustainable digital systems, practical engineering, and long-term collaboration.

MISSION

To deliver reliable, scalable, and maintainable technology solutions through disciplined engineering, structured execution, and customer-focused support.

CORE SERVICES

Operational service pillars.

Enterprise Software Systems

SAE develops enterprise software systems for organizations that need reliable workflows, role-based access, reporting, integrations, and long-term support.

- ERP systems
- Workflow systems
- MIS and reporting
- API integration
- Operational portals

Outsourcing & Workforce Solutions

SAE supports dedicated teams, contractual IT manpower, support resources, and workforce coordination for practical operational needs.

- Dedicated teams
- Contractual IT manpower
- Remote support
- Workforce coordination
- Operational support

Infrastructure & Security

SAE supports infrastructure setup and operations across servers, cloud services, SSL implementation, monitoring, and security-aware maintenance.

- SSL implementation
- Cloud support

- Deployment support

- Server management

- Monitoring

ICT Training & Consultancy

SAE provides ICT training and consultancy for organizations that need clearer processes, technical planning, and support-ready adoption.

- ICT training

- Workflow advisory

- Technical planning

- Operational training

- Process guidance
